

Insight:MobileAdvisor™

Insight:MobileAdvisor ties together procurement data, inventory data, distribution technology, end-user requests and workflow, offering you complete visibility and control over your mobile assets.

YOUR MOBILE ENTERPRISE AT A GLANCE

Mobile assets are defining and revitalizing organizations today, bringing customers and sales associates closer together, reducing approval times and helping global organizations take advantage of talent pools they have available around the world and around the clock.

Managing mobile hardware, software and carrier service for a large organization can be daunting. But the more visibility and control you have over your mobile assets, the more cost-effective your solution will be.

Insight:MobileAdvisor is a full-service asset management portal designed to give you a complete view of your mobile enterprise, ensuring optimal productivity, efficiency and compliance. This dynamic framework ties together all the various aspects of your mobility solution, including procurement data, inventory data, distribution technology, end-user requests and workflow. It's the first tool of its kind in the mobility industry, bringing important selection, acquisition and management features together.

PROCURE

- Integrate with Insight's eCommerce for Mobility portal or your existing procurement system.
- Understand trends and control mobility spending across the enterprise.
- Identify zero or excessive use accounts.
- Consolidate carrier billing, reporting and usage tracking.
- Cancel or suspend carrier plans or features.
- Give end users the ability to request new hardware, software, service plans or accessories.
- Give managers the ability to approve requests and view and analyze billing.

DEPLOY

- Identify unassigned devices and redeploy them.
- Integrate with your existing software deployment system.
- Allow users to download approved applications for installation.
- Deploy new software and patches to mobile devices with sporadic network connections.

MANAGE

- Manage a broad range of devices, including desktops, laptops and mobile devices.
- Clearly define and manage devices, voice/data plans, software and accessories by department.
- Manage carrier plans and minute pools.
- Gain clear views of your hardware and software inventory.
- Track installed software and entitlements.
- Manage accessories in inventory and track them by user and device.
- Delegate management responsibilities.
- Manage phone number porting.
- Support mobile users who have made invalid configuration and software changes.
- Support users with device, software or service-related issues.

SECURE

- Manage and enforce company policies.
- Protect handheld devices that store critical corporate information.
- Ensure your company has a solid approach to backing up and restoring critical user data.
- Give users a way to report lost or stolen devices quickly.
